TEMPLATE UPCHARGE

Each template not conforming to the “Template Instructions” will be subject to a \$20.00 template charge.

Examples of non-conforming templates include, but are not limited to:

- Short cuts with large spaces in between
- On material other than brown craft paper or red rosin paper (i.e., plastic, tar paper)
- Drawn on or cut from plywood, etc.
- An existing casing (we accept a tracing of the casing on paper – make sure existing casing fits first!)
- Any template that is not of the inside of the jamb or the inside of the casing
- Any template requiring a negative reveal
- Any template of a rough opening (we accept R.O. measurements for brow and half-round openings)
- Any template stating, for example, “extend this end 12”.”

Architectural Accents will not guarantee the fit of any casing or jamb made from non-conforming templates.

Remember, we assume the side written on is the front and make the casing face up. If this is not the case, clearly indicate which side is to be the face.

Architectural Accents will inform you before proceeding if the template does not conform to our standards.
